

STONE PAVILION

Organised by

28 - 29 - 30

January, 2026

**Helipad Exhibition Centre,
Gandhinagar, Gujarat**

Unifying Ceramics & Stone: Your Gateway to New Markets

Step into a purpose-built zone where stone and machinery innovators meet active buyers seeking future-ready surface solutions.

Strategically located at the heart of India's largest ceramics and tile fair, the Stone Pavilion creates a unified "surface-solutions marketplace"—bringing together technologies, equipment, and systems relevant to both the ceramics and natural stone sectors.

Whether you are aiming to elevate design aesthetics, boost structural performance, or diversify material offerings, the Stone Pavilion is your gateway to connect with decision-makers, showcase innovation, and expand your market footprint.

Western Region Focus: Gujarat is home to India's largest hubs for tiles and natural stone—yet the stone industry has long lacked a focused, dedicated platform in this region.

The Stone Pavilion bridges this gap, offering a purpose-built showcase for stone processing innovators to engage with key buyers already active in the market.

As one of India's premier stone processing hubs, Gujarat hosts over **2,500 processing units** across regions like **Morbi, Ambaji, and Idar**. These facilities handle a wide variety of materials—including **granite, marble, sandstone, and quartz**—and are equipped with cutting-edge technologies such as **gang saws, multi-wire cutters, CNC bridge saws, polishing lines, and resin treatment systems** to serve both domestic and global demand.

Exhibitor Profile

Natural Stone Quarriers
& Processors

Engineered Stone
& Aggregates

Stone Processing
Machinery & Tools

Chemicals &
Adhesives

Building & Construction
Materials
